

Fourth Report on the State of the Energy Union

The fourth report shows the progress made on the energy union since the start of the Juncker Commission. Building on results achieved so far, the report sets out legal rules, as well as political commitments and targets for a cleaner and greener world. It takes into account evolving global environmental, economic and competitiveness challenges.

The energy union aims to give consumers secure, sustainable, competitive and affordable energy. It does so by overhauling European energy and climate systems and policies, putting the EU at the forefront in addressing global renewable energy and climate change.
