

Japanese LNG buyer seeking price arbitration in possible 'bellwether'

An effort by a Japanese company to get lower prices on a liquefied natural gas contract signed a decade ago could be the first in a flood as buyers seek relief from legacy contracts amid cheaper spot supplies, according to an analyst at Credit Suisse Group AG. "This will prove the bellwether for more arbitrations and tougher LNG buyer negotiating stances across the market," analyst Saul Kavonic said in an e-mail. "We expect other traditional LNG buyers to quickly follow suit." The market will be awaiting what concessions Osaka Gas Co will be able to wrest from the marketing unit of the Exxon Mobil Corp's PNG LNG project. They entered into arbitration after a dispute during a price review, a spokesman for the Japanese firm said Friday, adding that the company is seeking to lower LNG costs. Exxon declined to comment. The dispute underscores the frustrations of buyers locked in contracts linked to oil benchmarks while spot prices drop to the lowest seasonal level in a decade. Most of Japan's LNG imports are

indexed to oil, which has remained a widespread practice since its inception in the 1960s. Sinking prices have put LNG producers under intense pressure to offer better terms. Even Qatar, one of the world's largest suppliers, made a "dramatic" break from tradition by offering mid-term LNG contracts at about an 11% oil slope, compared to more than 16% on some contracts signed in 2008, Fereidun Fesharaki, chairman of energy consultant FGE, said in May. The Osaka Gas contract with the PNG LNG project was agreed at a 15% slope to the Japan Crude Cocktail and runs through 2035, according to data compiled by Bloomberg NEF. Prices in the utility's current PNG LNG contract are more than double those on the spot market and about 30% more than recently signed contracts, Kavonic said. A shift to a buyers' market has emboldened consumers that historically have been concerned about security of supply to seek greater contract flexibility and lower prices. "It's unprecedented for a traditional LNG buyer to initiate arbitration in this way, presenting a new paradigm for LNG contract negotiations," said Kavonic.
