

Maritime Disputes in the Eastern Mediterranean: The Way Forward by Dr. Roudi Baroudi

Now available in English at Brookings Institution Press.
Coming soon in Arabic, French, and Greek.

Using satellite imagery, international law, and geodesic research, **Roudi Baroudi** walks readers through a road map for peaceful and responsible resolution of maritime boundary disputes in the Eastern Mediterranean. The volume draws upon the United Nations and its associated treaties, courts, and other institutions that have developed bodies of law and procedures to facilitate negotiation. **Dr. Baroudi** points to rapid advances of science and technology as the means to take the guesswork out of boundary delineation, making this route more reliable and user-friendly than ever before.

"An expert commentary and seminal work."

– **Ambassador John B. Craig**, Senior Fellow, Transatlantic Leadership Network; former Special Assistant to President George W. Bush for Combatting Terrorism, and former United States Ambassador to Oman

"Baroudi makes a powerful case for compromise so that the states of the region can move beyond their costly disputes and reap the rewards of cooperation. Dr. Baroudi's approach has much to teach us and will hopefully contribute to peaceful progress, if only the opposing sides will listen."

– **Andrew Novo**, Associate Professor of Strategic Studies at the National Defense University

"...The countries of the region, as well as the United States and the European Union, should embrace Baroudi's approach to reduce frictions and realize the benefits of this energy bounty."

– **Douglas Hengel**, Professional Lecturer in the Energy, Resources and Environment Program Johns Hopkins University, SAIS and Senior Fellow at the German Marshall Fund
