

Nakilat posts 10.5% surge in nine-month net profit to QR728mn

Nakilat reported a 10.5% year-on-year increase in net profit to QR728mn in the first nine months of this year.

The company's positive financial performance can be primarily attributed to better operational performance in managing its liquefied natural gas (LNG) and liquefied petroleum gas (LPG) vessels.

It also realised higher revenues on additional income from the acquisition of two additional LNG carriers and one floating storage regasification unit (FSRU) in 2018, as well as higher LPG shipping rates worldwide.

Nakilat has also successfully managed to reduce operational expenses through continuous rationalisation of activities, process enhancements, and cost optimisation initiatives to remain efficient, leading to a significant increase in the share price of the company during this period.

"Nakilat's strong financial performance bears testament to the company's ongoing emphasis and continuous improvements to remain competitive within the global energy transportation market, sustaining healthy cash flow and generating steady returns for our shareholders," said Nakilat chief executive Abdullah Fadhalah al-Sulaiti.

In the coming years, Nakilat expects to take on greater ship management responsibilities following the second phase of LNG fleet management transition from Shell and management transition of FSRU, as well as the addition of four new build LNG carriers to its fleet.

Nakilat's superior operational excellence in energy transportation and maritime services not only supports Qatar's vision in developing the LNG market, but also contributes towards developing the country's shipping and maritime industry, al-Sulaiti said.

"With greater demand for clean energy globally, Nakilat is ambitious in expanding our international outreach and diversifying our portfolio to meet the growing energy transportation needs. Together, we will remain focused on achieving our strategic goals while prudently navigating challenges, propelling Nakilat forward as a global leader and provider of choice for energy transportation and maritime services," he added.
