

QP commences supply of very low sulphur fuel oil at RLIC port

Qatar Petroleum (QP) has commenced the supply of Very Low Sulphur Fuel Oil (VLSFO) at Ras Laffan Industrial City (RLIC) Port. The VLSFO marine fuel offering has been initiated in advance of the International Maritime Organisation (IMO) 2020 regulation for a 0.50% global sulphur limit for marine fuels, which will come into effect from January 1, 2020. "We are proud to be one of the first countries to limit the availability of marine fuels to only grades that are compliant with the IMO's 2020 regulation for a 0.50% global sulphur limit," said HE Saad bin Sherida al-Kaabi, Minister of State for Energy Affairs as well as QP president and chief executive. QP, in conjunction with Woqod, initiated bunkering services in Qatar in June 2017 with the importation of its maiden HFO cargo (RMG 380 CST 3.5% sulphur) in order to cater to the bunkering needs of both Qatargas' LNG fleet and other vessels calling on Ras Laffan and the region. From June 2017 through August 2019, QP has successfully supplied over 1.5mn

tonnes of marine fuel to RLIC Port, which allows the further servicing for marine fuel at both RLIC Port and other ports in Qatar. QP has invited all vessel owners and operators seeking IMO 2020 compliant VLSFO to avail the services available at RLIC Port and other ports in the state whenever their vessels are calling at or passing by any of Qatar's ports. "We hope this (commencement of VLSFO) constitutes a major step towards protecting the regional and global environment in line with environmental objectives of the Qatar National Vision 2030," al-Kaabi said.
